

## Further information

Visit [developer.apmterminals.com](https://developer.apmterminals.com) for detailed information about our APIs, technical support and pricing, or email [digital@apmterminals.com](mailto:digital@apmterminals.com).

## Self Service

Our APIs use standard industry protocol, and modern security measures based on open standards, to ensure the set up requires as little effort as possible. Clear documentation is provided, and support can be accessed via [developer.apmterminals.com](https://developer.apmterminals.com).

## Pricing

Users can purchase credit bundles, based on their anticipated volumes. Credits can be used against a variety of API transactions, such as *Import Availability*. Credits can be purchased online using a credit card.

# API Store

Staying up to date in today's challenging logistics industry, while keeping costs low, is not easy. We're convinced that using modern, standardized and tested application programming interfaces (APIs) is the quickest and most cost-effective way to stay ahead.

## How can our APIs help your business?

APM Terminals' innovative, industry-leading APIs enable you to pull real-time container status data from its Terminal Operating Systems, into your own internal systems - a Transport Management System (TMS) for example.

APIs remove the need to look up information manually via our existing Track & Trace channels, making this the ideal solution for shipping lines, inland transporters, cargo owners and managers, and data aggregators who process higher volumes.

**Cost effective** - removes the need to look up a container's status manually

**Increased accuracy** - container data is transferred automatically removing the chance of human error or reliance on outdated information

**Time saving** - enables large volumes of data to be handled with no manual intervention

**Improved planning** - guarantees you're using the most up-to-date information available in the supply chain

## APIs Available

- [Import Availability](#)
- [Export Booking Enquiry](#)
- [Vessel Schedule](#)
- [Container Event History](#)
- [Truck Appointments](#)
- [Empty Container Returns](#)

## Terminal availability

Our Truck Appointment API is currently available for **APM Terminals Los Angeles (USLAX)**. All other APIs currently offer data for terminals in the following locations, with additional terminals being added during 2022.

If you'd like to be notified when we add new APIs or terminals please register for updates at [www.apmterminals.com/api](http://www.apmterminals.com/api).
